

RE-IMAGINE STEAM!

Barry County Science Festival 2020

Let us spark your curiosity and inspire your imagination!

Come celebrate the many ways science, technology, engineering, art, and math (STEAM) touch our everyday lives with the 3rd annual Barry County Science Festival. Stop by the Institute or Hastings Public Library the week of October 19 – 23 and pick up **STEAM Grab and Go Kits** to learn about everything from migrating butterflies to tree rings.

Join us on the Institute's Facebook page on Saturday, October 24, to interact with STEAM-based hands-on activities and demonstrations presented by local organizations. There is something for everyone at this free event. All programs last for 30 minutes.

- | | | |
